Page plan: what each page must answer

Sketch on paper or in Word. Nothing is built in Power BI yet except a test connection.

1 · Overview

For leadership. Is the business healthy?

Customers | Leads | Conversion

Deal value | First reply | Late pay

Monthly leads line, stamp duty marker

Tables: clean_leads, clean_transactions, clean_payments, clean_customers

2 · Segment deep dive

For marketing. Who are our customers and which segments bring value?

Share of customers vs share of value by segment

UK vs overseas, budget, browsing

Waits for DS segments (Day 9–10)

3 · Pipeline and agents

For the sales director. Which channels convert, how fast do we reply?

Conversion by first-reply band

Seniority: reply time and conversion

Tables: clean_leads, clean_agents, clean_interactions

4 · Payments and lettings

For finance. How much money is late, and is it getting worse?

Late or overdue share by month due

Deals vs value: sales vs lettings

Tables: clean_payments, clean_transactions

Plus a hidden **Data check** page for the DA team (row counts, data issues, KPI reconciliation). In Power BI today: connect to **localhost / veltrix** to prove the connection works, and set up the business question log in Excel.

Veltrix | Overview | Segment deep dive | Pipeline and agents | Payments and lettings | Data check | Data to 30 Sep 2026

1 Insert › Shapes › Rectangle, fill navy **2** Insert › Text box: type Veltrix, white, 22 pt **3** Insert › Buttons › Navigator › Page navigator **4** Insert › Text box: Data to 30 Sep 2026

Rows loaded per table (Card visual, ID column set to Count, display units None)

locations 36	agents 300	customers 102,000	campaigns 270	leads 95,804	interactions 532,789
properties 16,667	site_visits 233,593	transactions 16,665	payments 106,199	campaign_responses 808,953	web_sessions 2,003,460

Reconciliation: Power BI rows vs SQL COUNT(*)

table_name	powerbi_rows	sql_rows	matches
agents	300	300	True
campaign_responses	808,953	808,953	True
customers	102,000	102,000	True
interactions	532,789	532,789	True
leads	95,804	95,804	True

... 7 more rows, all True

Checkpoint, end of Day 2 (about 10%)

Power BI connected in Import mode

Every row count equal to SQL

Veltrix theme applied (Design › Themes)

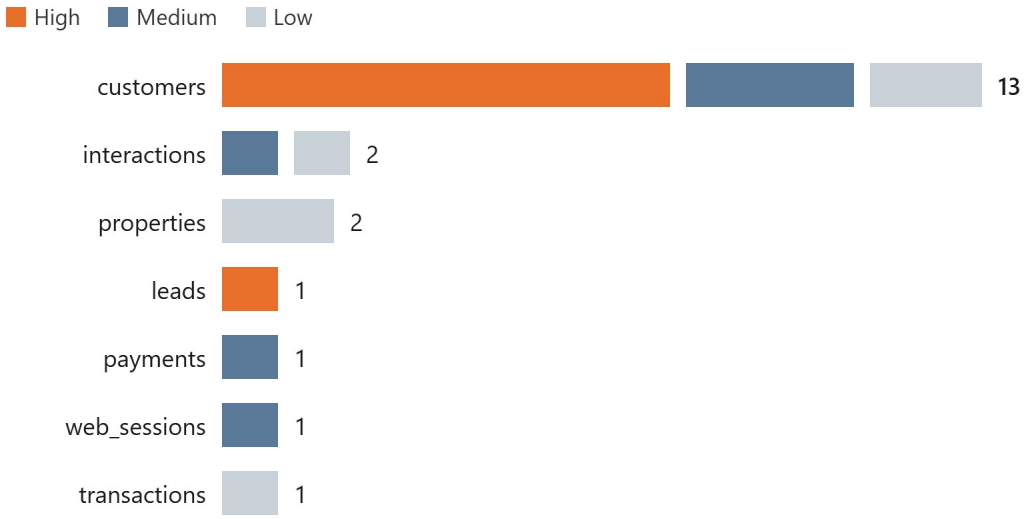

Header group copied to all 5 pages

property_views (15.2M rows) stays in SQL only

The Day 2 row-count cards and reconciliation table stay on this page; the two Day 3 charts go below them (or on a second Data check page).

Customers carry 13 of the 21 data issues

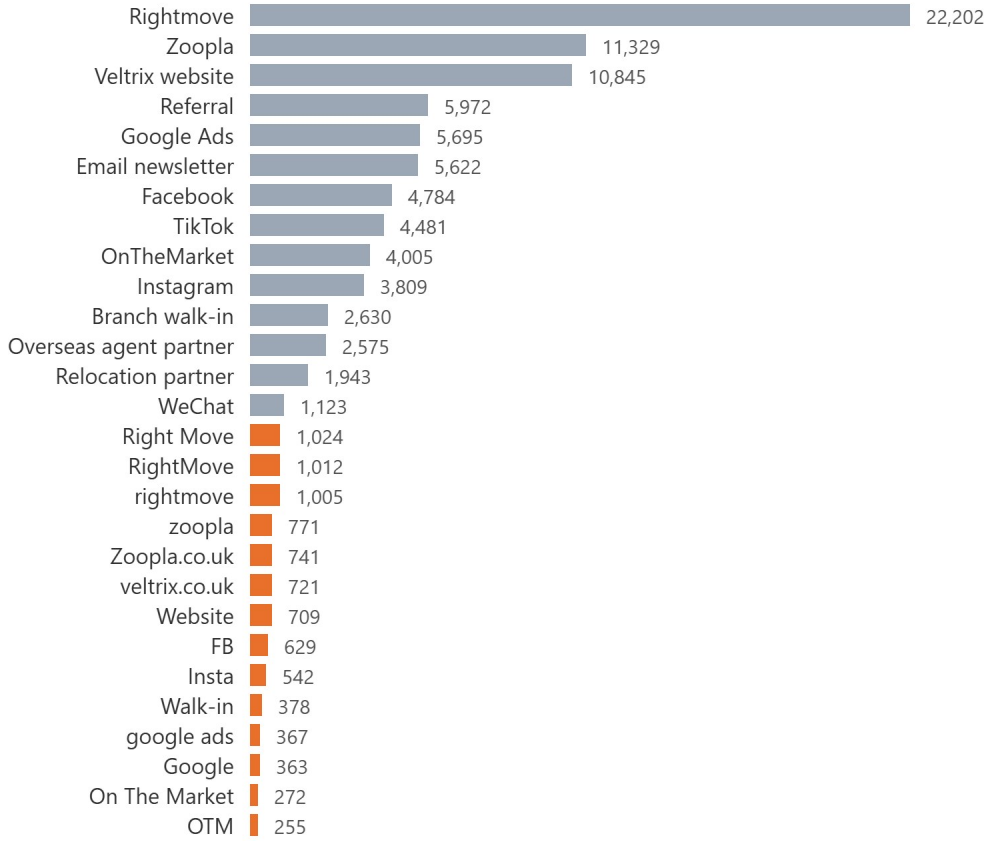

Stacked bar chart · Y: table_name · X: Count of issue_id · Legend: severity · Filter: severity is not Pass or Info

KPI footnote (text box, on every page): Conversion = won ÷ closed leads (Won + Lost), open leads excluded. Deal value = agreed price for sales; monthly rent × tenancy months for lettings. Customers counted after merging duplicates.

28 spellings for 14 channels: the channel chart needs cleaning

Bar chart from raw leads · Y: lead_source · X: Count of lead_id, sorted descending · **orange = variant spelling**

Last 12 months (Oct 2025 – Sep 2026)

Open pipeline now: **4,380 leads**

Customers	Leads	Conversion	Deal value	First reply	Late payments
100,573	**28,999**	**17.8%**	**£1,440m**	**4.1 h**	**8.0%**
after merging 1,427 duplicate records	+2.2% on the year before	won ÷ closed, down from 18.7%	by contract date, up from £1,189m	median; only 15.6% within 1 hour	of payments due, up from 7.5%
Measure: Customers	Measure: Leads 12m	Measure: Conversion % 12m	Measure: Deal value 12m	Measure: Median first reply (h) 12m	Measure: Late payments % 12m

Space for the Day 5 monthly leads line chart

Conversion = won ÷ closed leads (Won + Lost). Deal value = agreed price for sales; monthly rent × tenancy months for lettings. Customers counted after merging duplicates. All visuals read clean_* tables.

Veltrix

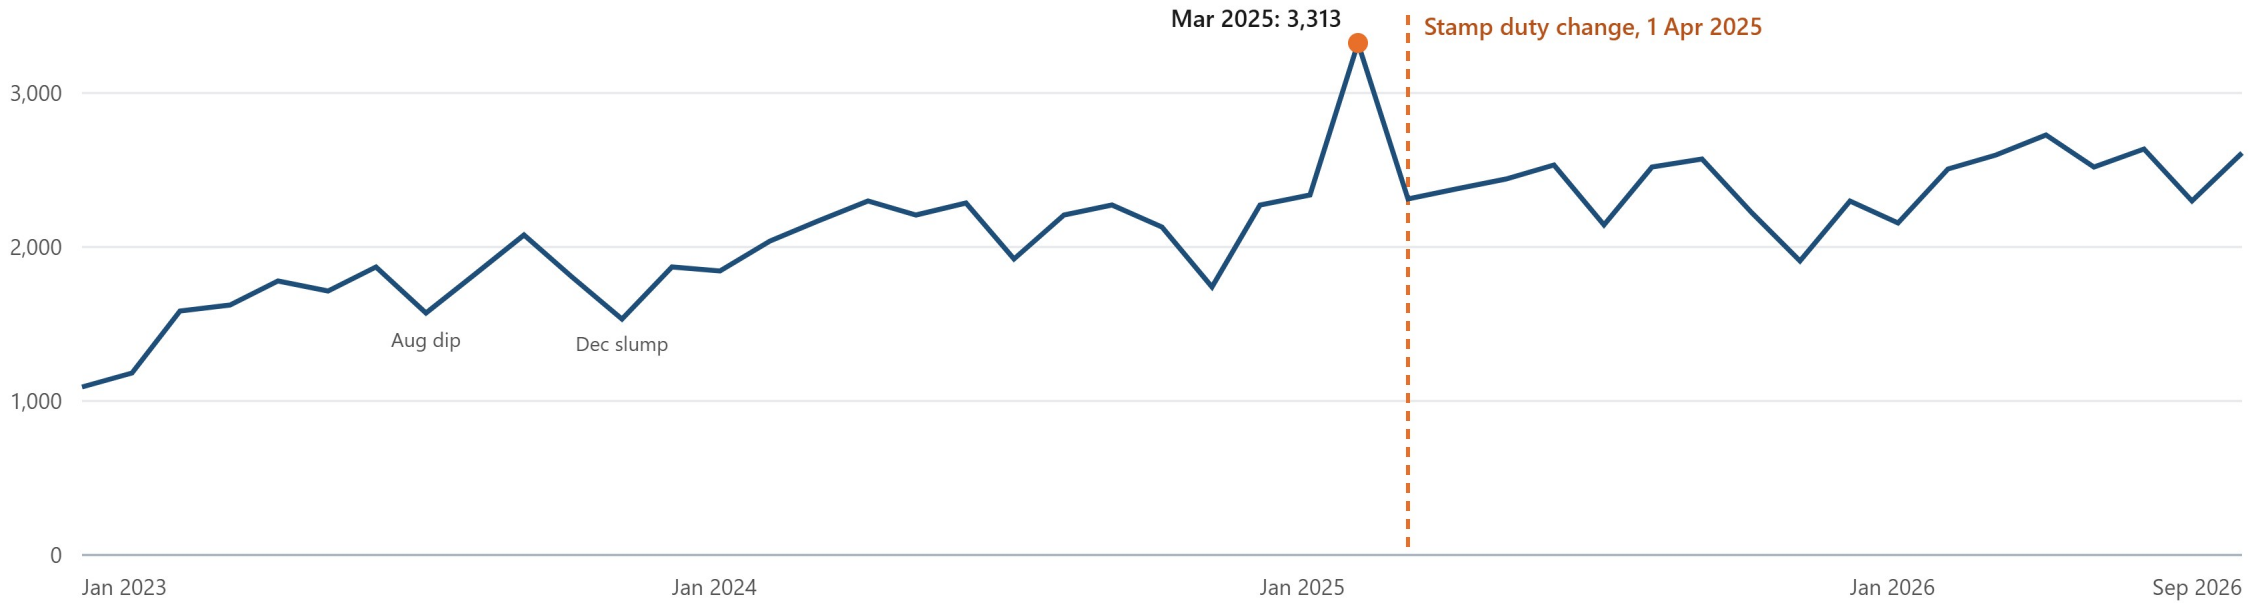

Overview | Segment deep dive | Pipeline and agents | Payments and lettings | Data check

Data to 30 Sep 2026

Customers	Leads	Conversion	Deal value	First reply	Late payments
100,573	28,999	17.8%	£1,440m	4.1 h	8.0%
after merging duplicates	+2.2% on the year before	down from 18.7%	up from £1,189m	15.6% within 1 hour	up from 7.5%

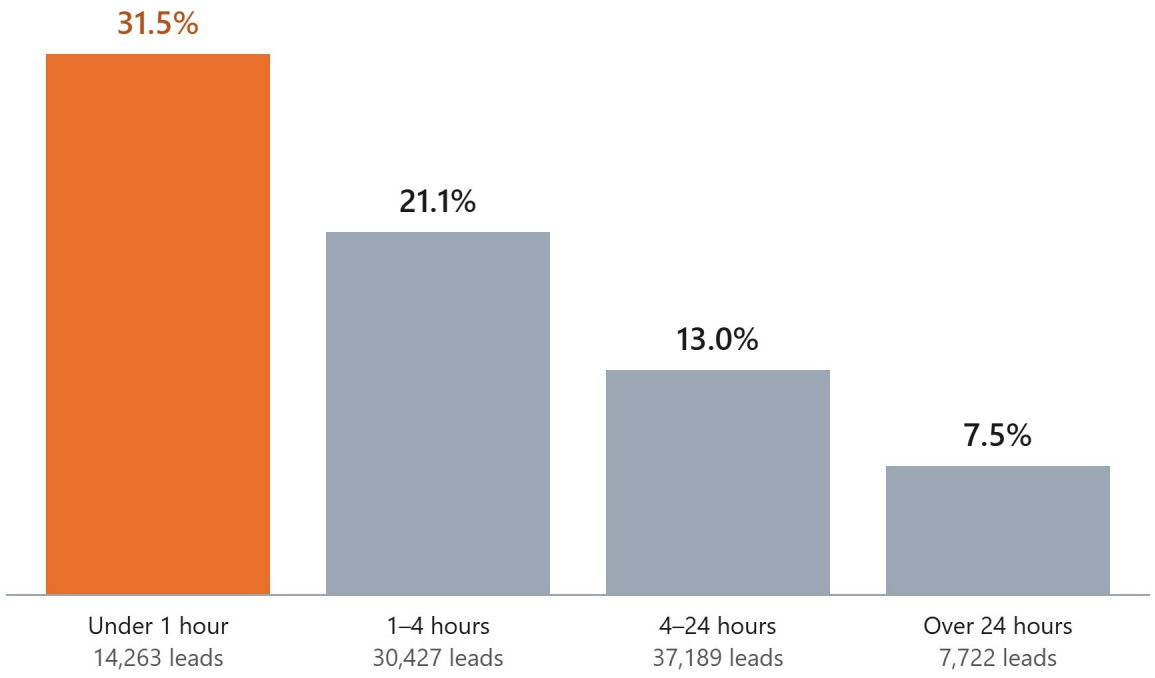

March 2025 leads jumped 42% before the stamp duty change

Line chart · X: monthly_trend[month] (Type: Continuous) · Y: leads · Analytics › X-axis constant line at 01/04/2025

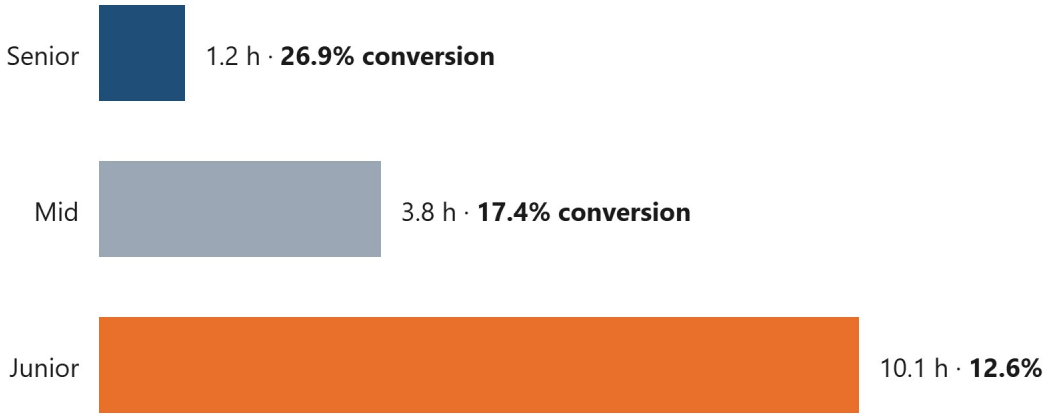

Leads answered within an hour convert 4.2× as often

Line and clustered column chart · X: first_reply_band (Unknown filtered out) · Columns: Conversion % · Line or labels: Closed leads

Seniors reply in 69 min and convert 26.9%; juniors take 10 h and convert 12.6%

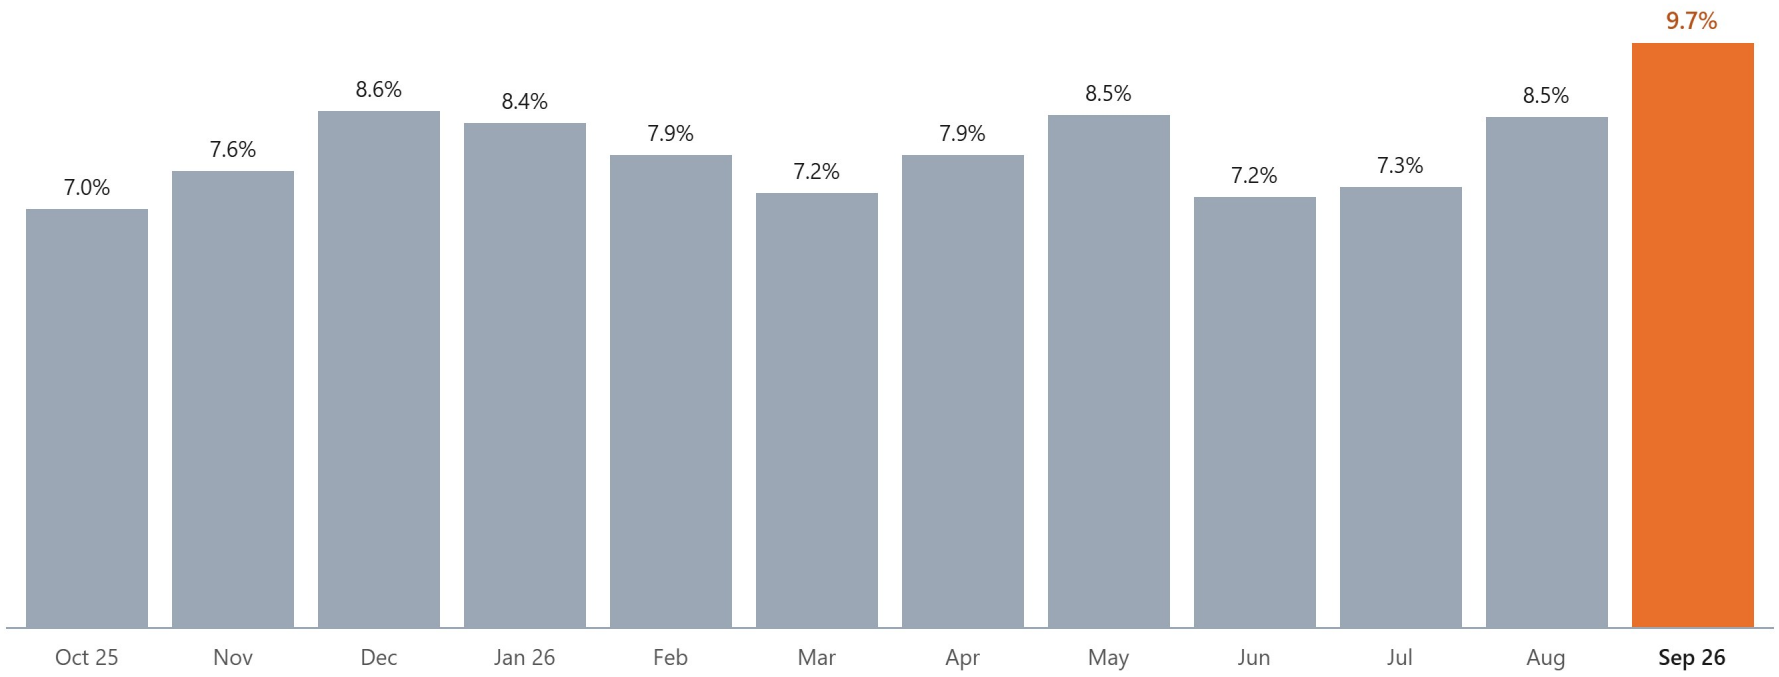

Clustered bar chart · Y: clean_agents[seniority] · X: Median first reply (h) · Data labels › Value: Conversion %

Reply speed explains 55% of the gap: at seniors' speed, juniors would convert at 20.4%.

Late share is flat at 7–9%; September is high because 95 payments are not yet chased

Column chart from eda.late_share_by_month_due · X: month_due · Y: late_pct · Columns › Colour › fx rule: Sep 2026 orange · Tooltip: still_overdue

Late payments, 12 months

8.0%

up from 7.5%

Still overdue

146

51 due in Aug, 95 due in Sep 2026

Later weeks: deals vs value, sales vs lettings (lettings are 28% of deals, 2.9% of value)
